COMMENT OF

Labour's Colonial Policy

come at present devoted to the needs of our colonies and of the underdeveloped areas of the world generally quite inadequate and that one of the first steps of the next Labour Governis the pertinent key passage the British Labour Party's "Economic Aid", the second instalment of their new colonial policy, announced today. but the question it poses remains unanswered.

The authors of the policy an average of one per cent of Britain's national income or about £160 million year towards the implementation of the plan. The money is to be raised by cutting back personal consumption by taxation or some other means, or a reduction in some item of government expenditure, At the same time the party manifesto sees the necessity for more work and further Racrifices.

These are brave words indeed, but the manifesto makes no mention of what taxes would be raised and by how much; nor what government expenditure would be reduced. All of which leaves British voters well! up in the air and as Labour governments tend to increase the numbers on their payrolls the unpalatable thought of further increases in taxation remains, the authors have

apparently attempted to forestall the argument that the plan would have an inflationary effect in Britain as they say that the country must achieve a genuine trade surplus to cover the export of resources for development purposes.

However, there is not even the slightest hint of how a "genuine" trade surplus is to be achieved except that too, is hardly a vote catch- Egypt. ing point and is also unpalatable.

Possibily the most interesting reform will be the attempt reconstituting Colonial Development Corporation by planning longterm development projects est loans and reversing the Conservative Government's decision that colonies become ineligible for CDC assistance after the attainment of independence.

THERE is a great deal of posal as the CDC has had first visit to England in 18 months its efficiency improved under and cheerfully told newsmen he the management of Lord Reith, Its prospects are now extremely bright and it seems unrealistic ed in Malaya and the Gold taxes.-Chica Mail Special. Coast should be abandoned. As the British colonial empire

contracts the corporation should be expanding in the ex-colonial territories with the assistance of British Government capital and if this is not possible because of the increasing strain on should be seen from all parts of the British taxpayer then the earth except the immediate the next best alternative is polar regions, Moscow radio said the formation of a Commonwealth agency to fill the

The Labour Party may have this object in mind as the manifesto states that there must be intimate collaboration between the metropolis and the colonies and exto be achieved.

FIRESS BULGANIN TO GET REPLY

Macmillan Finishes Letter

London, June 4. British Prime Minister, Harold Macmillan has put the finishing touches to the reply, drafted by the Foreign Office, to the long letter sent him on April 20 last by the Soviet Premier, Nikolai Bulganin, informed sources stated tonight.

The Permanent Council of, the North Atlantic Treaty Organisation, at its weekly meeting in Paris tomorrow, will be informed of he contents of the letter by the British delegate, Sir these Roberts. Frank sources said.

Return

The message will be delivered to Bulganin after his return from his visit to Finland, (The Soviet Premier is due to leave Moscow with the Communist Party First Secretary, Nikita Khrushchev, for Helsinki tomorrow).

Bulganin's letter dealt with four main questions: The Middle East, Disarmament, Euro-pean security, and Anglo-Soviet

Macmillan, in his reply will briefly question of the Middle East, which will be dealt with separately in the replies to be sent by Britain, France and the United States to the Soviet notes of April 19 on this question,

Reaffirm

On disarmament, the British Premier will reaffirm the British point of view on the need to reach a general agreement by stages under international contitol. He will also stress the possibility of reaching a limited disarmament agreement as a result of the current meetings in London of the UN disarmament subcommittee.

Because of the West German election campaign. Macmillan will deal only in general terms with the question of European steurity, informed sources said. Bulganin in his letter raised the question of an official visit to Moscow by the British Premier. Macmillan in his reply epidemic at the moment. will state that such a meeting would have to be carefully prepared.-France-Presse,

FACILITIES FOR SUPER TANKERS

London, June 4. Plans to equip British ports with facilities for handling super tankers bringing oil from the Middle East to make Britain less dependent on the Suez Canal were disclosed in the House of Commons tonight.

Mr Harold Watkinson, Minister of Transport, told a questioner he had already held discussions with the interests concerned with Milford Haven, in Wales, who were seeking powers to provide facilities for ships up to 100,000 deadweight tons. At Southampton plans were going forward for tankers up to 05,000 tons to be handled.

NEW JETTY

On the Clyde, in Scotland, a new jetty was to be provided capable of accommodating ships up to 100,000 tons.

On the Mersey, in northeast England, a new oil berth was contemplated capable of taking ships up to 65,000 tons or up to 100,000 tons with a draught restriction.

On the Thames, the Port of London Authority, and the all companies were discussing the dredging necessary to raise the present limit of 45,000 deadweight tons. A number of other sites were also being surveyed.

"British oil companies were preparing to handle an increasing number of super tankers and Milford Haven looked like becoming a major European oil port," he said.— China Mail Special.

ZOLI SURVIVES VOTE

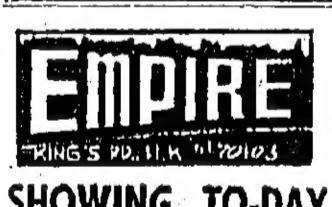

Rome, June 4. Premier Adone Zoli's Christian Democrat government sailed through its first vote of confidence in the Italian Senate stonight on the impulse of a slashing attack on the Communists and their Left Wing So-

Premier Zoll won the test by a margin of 30 votes. The vote was 132 for to 93 against with four abstentions,

Two-Fold H-Bomb 'Bluff'

Exeter, June 4. The Bishop of Exeter, Dr R. C. Mortimer, said here today that while he believed that British possession of the H-bomb was a deterrent to war, British policy on the bomb was based on a two-fold "bluff" which might sooner or later be called.

The Bishop said the governthat in certain elecumstances of Presidential envoy." Britain might initiate H-bomb warfare although the enemy had not yot used the bomb.

TOLERATE

Dr Morlimer said that in the first place, the British people would not tolerate being the first to use the "H-bomb" and secondly, that Britain was one of the powers, "in the worst position to engage in H-bomb or momic worfare."

He said: "The size of Britain and the concentration of our industrial areas make our total destruction in such a war inevitable."

The Bishop urged the Government to press on with plans for mutual dissemments and inagention. - Presue-Presse.

Chincom Trying To Salvage Remains Of China Embargo

Copenhagen, June 4. The Danish Government has decided to inform the Government of Communist China that Denmark is ready to start negotiations for a trade agreement between the two countries, a Danish government spokesman announced here tonight.

The spokesman said that Denmark — against the background of Britain's decision to modify restrictions on exports to China — will bring her export controls regarding Communist China on to the same level as those regarding East European countries.

It is understood that at to-

day's meeting the French delegate reviewed the history of the embargo and called for a ununimity in support of the remaining controls which will in future apply uniformly

These controls cover the socalled List "A" which includes highly strategic goods such as atomic energy equipment and war materials.

Sources said that it had not yet been decided whether to abolish Chincom as an independent committee and to merge it with Cocom-the committee which administers the Soviet bloc controls. The committee might be retained as a face - saving measure, the source added.

SUGGESTION THAT CHIANG VISIT U.S.

Taipei, June 4. A Taipei newspaper editorial suggested today that President Chiang Kai-shek should now pay a visit to the United States.

At the same time, the Ta Hua Evening News sald, President Chiang "should send Vice President Chen Cheng to tour other ment's policy seemed to assume friendly countries in the capacity

POINTED OUT "Such visits will undoubtedly help further the friendly relations with our allies," it said. The independent newspaper pointed out that among all the leaders of the important democratic countries, Chiang is probably the only one who has not visited the United States. It also called attention to the

fact that none of Nationalist China's Prime Ministers has ever made a foreign visit, The editorial, apparently inspired by the visit of the Japanese Premier Nobusuke Kishi to Taipei, said "we have extended warm welcome to our friends who came from far away, but, we shall be conaldered as uncourteous if we do not coturn their visits."--- United

FOR NATO'S CONDUCT: ISMAY

London, June 4. Lord Ismay, until recently Secretary-General of the Atlantic Pact, tonight gave five rules for Nato's conduct.

He told at a dinner given by to be washed, do not wash it in the English Speaking Union of public."

STIRLING MOSS he wearing of

MO know the odds driver like Stirling Moss has to face, the only way is to follow him abroad from track to track, with the Grand Prix circus. Let us take a sample year, 1955, when he drove with the fabulous German "Silver Arrows" as No. 2 driver to World Champion Juan Fangio.

The story of Stirling and the "Silver Arrows" starts in December, 1954, when the news broke that the Englishman had signed a contract to drive for Mercedes-Benz in 1953. In his press photographs, Stirling, then twenty-six, looked almost absurdly young: Only one other poured over him. Englishman—the brilliant Richard Seaman-had ever received a similar invitation. He was killed in a Mercedes at the Belgian Grand Prix, on the eve of the Second World War, in

The first time Moss tried out a Mercedes was on the Hockenheim circuit, in Germany, driving rain. He equalled the fastest time of Karl Kling, one of the German drivers, in dry weather.

Buenos Aires

The thoroughness of the German equipe impressed Moss. He was not very comfortable in the driving seat. When it had been removed and modified, Moss sat on top of it, while Neubauer, the team chief himself. dussed around till he was sure it was cars from the general entry. absolutely right. The Mercedes men insist that not only must the car be absolutely right but the driver absolutely comfort- five laps he and Fangio, both in artificial one, built in open his number I driver, should be

World Championship series took Fangio bettered just before half the spectators' point of view and allowed for once to go all out place at Buenos Aires, on a 2.5 distance by one-fifth of a second. one which affords them an ex- for mile artificial road circuit, not dast compared with some Eurothe Hongkong citizens of tricky curves. The month was Moss was in the lead, sent to:—The Hon. Treesurer, The January, the Argentine high January, the Argentine high summer, and the weather was very hot. When the race started, laps—Moss was well ahead of in 1985 by a drizzle of rain at third lap and stayed there for view again, screaming down off the temperature was 140 degrees Alberto Ascari, driving a three-quarters distance. Fangio the rest of the race, except for the banking on to the left-hand

drivers who started the 96-lap. 3-hour race finished it without relief. Both were Argentines. Fangio and Micres.

But it was not Moss's fault that he was relieved. On the thirtieth lap, he stepped out on the circuit, with a fuel vapour lock. He was immediately seized tory out of his grasp! by officials and bundled into an ambulance. Only after struggling wildly with the ambulance attendants did he manage to get back to the Autodrome where he took over the Mercedes Karl Kling, who was suffering from quite genuine heat haustion. Eventually, he finished fourth. The winner was Fangio, who averaged 80.57 miles per hour, and was never relieved. but on one occasion came into the pit and had gallons of water

Monte Carlo

The next championship event of 1955 was in May in Monte Carlo. This race the Monaco Grand Prix, is held on a twomile circuit in Monte Carlo itself, past houses, on everyday roads. It had been chosen, this year, as the Grande Epreuve towards the World Championship of which the winner would be awarded the Grand Prix

The circuit at Monte Carlo Is dangerously narrow and winding. There are two hairpin bends and eight major corners. It is called "The Race of a Thousand Corners" because there are ten corners a lap and a hundred laps, The field, in 1955, limited to the fastest twenty

In two minutes. Moss was away again,

> He now proceeded to lap at fantastic speeds in the region of 2 minutes 47 seconds, finally setting up a new lap record of 2 minutes 46.9 seconds (134.04 miles per hour) which Fanglo could not equal. But on the twenty-eighth lap he packed up at the Vialone curve with gearbox trouble.

It was his last race with the Grand Prix, Mercedes-Benz and no one can deny that, though he had to play second fiddle to Fangio throughout five of his six Championship events, he had gained wonderful training the art of Grand Prix

German 2nd

How wise he was to join the German team is shown by the fact that throughout the whole of the 1955 Formula I season, British cars had only one success out of thirteen major events. This was in Sicily where young Tony Brooks won the Syracuse Grand Prix. No wonder people were saying what a shame it was that no per one could build a British racing car fit to match Stirling Moss's skill. Would he ever be able to in go out after the World Chamthe pionship on a green car? At least, he had finished the season second to Fangle in the championship table. It had been a good year.

ACOBY ON BRIDGE

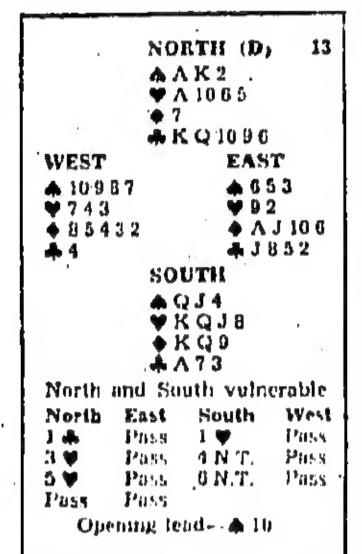

East Aids By Good Plays

By OSWALD JACOBY

OURT RUSH of New Bruns-N.J., writes Wick, follows:

"When my partner jumped my simple one heart response to three I looked forward to the thrill of a grand slam. Needless to say, I was disappointed when his five heart bid showed that he only held two aces so that the grand slam was out of reach.

"In rubber bridge I would have made the safe and sane bid of six hearts but this was duplicate and I wanted that extra 10 points for six no-trump. "I won the opening spade lead in dummy and run my four heart tricks just for practice in playing out high cards. I then played to dummy's king of clubs and back to my ace. When West showed out I wished that

had been content with hearts but it was too late for wishing, I led a spade to East played the jack and I won with the king.

monds and a spade go on the heart leads so he had to throw realised that should be throw the ten spot I would put him in with the ace. His only hope was that his partner would hold the queen of diamonds.

"He discarded his are of diamonds whereupon both my diamonds were good and I wound up making seven." Thank you, Mr Rush, for an

interesting hand. My sympathy goes to poor East who made two good plays but wound up in the ashean. I imagine he would have been just as badly off if Expect the unusual and you will not he had made his acc of diamonds.

fashion reveal how certain devices are adopted

fashion trade, only 'larger than fashion. 'average,' Junoesque', 'plump' or The choice of materials is at the most 'young outsizes' with tremendously important in bigger size styles. For dresses woollens such as afghalaine, are particularly flattering to In other words, the fashion wool crepe, light wool jerseys designers have accepted the fact or fine worsteds are preferred. that though some figures are above size 18 or 20, they are In suits the smooth surfaced materials are kinder and Vess bulky in the larger sizes. For dowdy. And a well-dressed couts; also, plain wool velours statistics, need certainly not look tweeds in muted shades are preforred to, pile fabries which add There is, however, a definite

trend towards less big sizes, If a woven patterned or printed material is used the small turers specialising in outsizes. They explain that they are indefinite patterns are certainly rarely asked for hip sizes 58 or more flattering than the blg. 60 and where size 48 was the bold or startling designs which entch the eye. This does not top seller in the O.S. range, mean though that the garments need be dull. Fine embroidery is often introduced to relieve a Norman Linton worked it out plain surface and break up any suggestion of size. orders he reckoned three were

SLIMMING EFFECT

Certain devices are adopted There are many possible reaby the best designers in the styles for the larger woman. It is, of course, well known that the diagonal line of a cross-over bodice has a very slimming birth, and corset manufacturers effect. But the style is often old and though suitable for a grandmother in her sixtles, it is But the manufacturers of the not favoured by her outsize Batchelor, author; Columbus O.S. fashions can also claim to granddaughter in her twentles. But the principle of the diagonal line remains a alimming device, breaking up the width of bodice or skirt and is therefore often incorporated in young-looking

> styles. For instance, pockets are rarely set horizontally on a larger size dress, more often they are placed at a slant across the hips, slicing away the width at these angles. A sideways drape is another alimming device, but great care has to be taken that the drape comes neither too high nor too low on the figure.

> Floating puncls, attached few inches below the waist seam add height to a short stout figure, but they nust be placed nearer the centre front of the skirt and away from the hipbone. This was seen to good effect in a dress in cherry red afghalaine of the new Norman Linton collection,

On the bodice of fine wool dresses, Linda Leigh introduces the 'American drape'. This is a pleat of the material at shoulder level and gives easiness across the bust without fullness.

by the best designers in the styles for the larger woman. FIAIR, fat and forty' this used have helped women to look and Necklines are important, too. Most women who wear outsizes tion of many women. fat. These examples

short, plump necks, Rocciiff and Chapman use the Paris-Inspired vestee to give variety to the V neck of a dark green fine wool dress. Their variation of the standaway collar is set lower in the larger sizes so that the neck of the wearer is not concealed or unduly shortened.

fashionable standaway collars

WOMANSENSE

CAREFUL DETAILS

Details must always be very carefully checked on big sizes. If, for instance, a dress has a belt it is best made in the same wool materials as the dress so that it is unobtrusive, and it should be narrow. Buttons, on the other hand, should be large and important, by contrast taking away from the size of the dross.

Coats designed for larger sizes are usually cut fairly straight, though Harella introduces an interesting panelled back to give a swing without clumsiness. They are given important collars to add width to the top of the figure and preserve the balance of the silhouette. Care is taken in placing the pockets so that they do not add width where it is not wanted.

Suits for larger sizes are mostly classic in style with simple revers to a single breasted jacket. The short cropped jacket and the square boxy type are neither of them sultable in big sizes. But though simple in style the fashionable relaxed tailoring is kind to the big woman. Big pointed collars instead of

revers are smart and flattering in outsizes. In a suit by Harella in Irish pebble tweed, the points of the collar are echoed in the

— Patricia Douglas

NORMAN LINTON: This fine black wool dress, specially styled for the O.S. figure, introduces black satin draping to soften the neckline. The pannier effect, draped diagonally across the hips, is a clever slimming device. ROECLIFF and CHAPMAN: In this afternoon style in fine dark green wool, the Paris-inspired vestee is used in the wide V neckline. The soft self belt can be tied to suit the figure. ROECLIFF and CHAPMAN: The upstanding collar of this dress in black wool is cut lower for the big sizes to show more neckline. In the slim skirt shaped panels flare smoothly at the back to give movement. HARELLA: This deep blue wool velours coat is particularly becoming to the big woman. It has a high wide collar which gives importance to the top of the silhouette, The cuffs are similarly shaped, and are trimmed with the same large buttons used for the fastening. HARELLA: An Irish pebble tweed is used for this fashion-conscious suit with the semi-fitted line which is a figure-flatterer for large sizes. A large pointed collar takes the place of revers. LINDA LEIGH: This interestingly-styled dress in cherry red wool is trimmed with bands of black knitting at the deep V neckline, pockets and cuffs. The bodice is out with the 'American drape' at the shoulders, which controls the fullness. By broadening the shoulders the hips appear slimmer.

FONDA PUTS THE FINGER ON THE FANS RACKET

ROBERT ROBINSON

Angular as a set of theorems, Mr Henry Fonda, 20 years a star, loped across the thick carpet like a slack-shouldered ostrich.

He sat down in a corner of the room in the Connaught Hotel with his knees sticking up and his elbows sticking out. He looked as if he had been constructed out of pipe-cleaners.

Mr Fonda pointed his long sad face at me, a face which put me in mind of a Gothic window in a Victorian chapel, and said, amiably but with conviction:

spared a repetition of the renewals won by Narrator, in the top class.

1955, and Tropique a year ago, when the first half-mile was run

Frie is an altogether different howling mob. They don't care howling mob. They don't care liable to hurt someone."

"And that's when I get into a parasites who live on the bodies of film-stors. They are a claustrophobic, and then I'm howling mob. They don't care liable to hurt someone."

DESPONDENT

in packs at film festivals.

TERRIFYING

"The other day in Cannes I watched them descend on a young blonde like locusts on a green field. The girl was terrorstricken—it turned out she had nothing to do with films at all." On the screen, Fonda seems a languid character. In the flesh, he's a ball of fire.

He said: "When a mob of fans comes up to me, why I go through it like a football for-"I deren't stop. If I stop— when you talk to just once, to sign a single talk to the real man. autograph-I'm submerged.

Last year's 2,000 Guineas Postponed Games The following players have

been selected to represent their Pirate King was particularly respective clubs in the post-impressive in his only race so poned Lawn Bowls League for this neason. The only doubt games today:

A. G. Sinley, N. A. Brown, J. L. Mouatt, J. R. McAusiand (Skip):

A. B. Coleman, N. F. Fahy, W. H. Pritchard, L. M. S. Lloyd (Skip):

This is Fonda's first venture in production. It is a dry, spare unfolding like a entertainment, a moment of truth looked sad as he H. G. Banham, D. T. Smith (Skip). magnificently dwarfing those Very sad indeed.

INTERNATIONAL HIGHWAYS

European To Be Linked By High Speed Roads

By GORDON MARTIN

Geneva, June 4. Western European capitals will be linked, by 1970, by about 6,200-mile network of high speed motor roads if plans now being drawn up by experts in seven different countries, materialise.

A report published by the International Road Federation at its Geneva headquarters shows that at present Western Europe has only about 2,191 miles of these highways, out of a total of about 1,134,217 miles of roads of all categories.

Tunnels

jects are also being planned.

Only seven countries, Belgium, France, Germany, Italy, the Netherlands, Portugal, Sweden, claimed to have roads specially designed for highspeed traffle.

Names

These roads, for the use of which a toll is often levied, are known by a variety of names.

In Germany, they are called 'autobahn," in Italy 'eutostrada," .in France "autoroute," and in the United States "turn-Britain reported to the Foderation that she has no such roads and therefore no special nume for them.

Western Germany, with about ,250 miles of autobaknen, constructed before World War Il as part of Hitler's plan to give the country a dirst class communications system for military purposes, has a network twice as long as that of the other six countries put together. Three of the autobahnen cross the East-West border to Berlin, and another stretches east out of the city into Poland.

The Netherlands has an effec-390-mile through-road system radiating out from The Hague, on the west coast, north to Amsterdam, east to Utrecht and Arnhem, and south through Rotterdam to the Belgian

Belgium has a 75-mile fast road from Brussels to the coast at Ostende, and France has some stretches centred on Paris and Marseilles.

Autostrada

Italy has about 330 miles of 'autostrada." Most of this total goes into the highway across northern Italy from Bresoin 40 the city of Turin, the centre of Italy's motor industry. Another toll road links Florence and

A non-toll highway, built as part of Mussolini's grandiose project to develop Rome towards the sea, links the capital with the coast at Ostla, the favourite beach resort of the city's 2,000,000 inhabitants.

Sweden and Portugal claimed to have only 10 and 5 miles respectively, while Britain, Den-mark, Finland, Norway, Spain and Switzerland, claimed none

Plans are under way in many countries, however, for a great expansion of highway construction, which will treble the existing mileage of fast arterial roads.

Milan-Naples

In Italy, engineers are ready to begin work on a 550-mile "autostrada del sole" (Highway of the Sun) to link the fastdeveloping south with the industrial north; Starting from Milan, this road will, it is hoped, eventually go as far as Naples. Preliminary work has begun on the Milan-Florence section.

France has recently launched a second five-year plan for build-ing about 1,250 miles of fast, arterial roads, Belgium will continue the road from the Channel coast through Brussels to the German frontier, and Germany will construct another 1,000 miles of autobahnen and 2,600 miles of first-grade "federal roads."

Switzerland's first new arterial read will run from Geneva through Berne and Zurich to Lake Constance on the German

Claim For Theatre In NT

A claim for possession of Shek Wu Theatre in Sheung Shul, New Territories, by its registered owners was brought before Mr Justice T. J. Gould, Senior Puisne Judge, in the Supreme Court this mornthe metion must continue to ing.

Cheung Yan-lung and Cheung Ka-ku, merchants, also elaimed for intermediate profits at the rate of \$1,500 a month from May 16, 1956, until ticlivery of possession to the plaintiffs,

Defendants are Young Yimming and Young Chi-ling, merchants; of the Shek Wu Theatre, Kwong Fook Street, Shek Wu Market, Sheung Shui, New Territories.

Plaintiffs were represented by Mr 'Oswald Cheung, instructed by F. Zimmern and Co. Mr Brook Bornacchi and Mr Victor Gittins, both instructed The victims in four of the by M. K. Lam and Co. apcases were Chinese women and peared for the defendants.

ENTIRELY NEW

Mr Cheung said the stated that the plaintiffs were the owners of the premises which was an entirely new

By an oral agreement on or about October 18, 1955 plaintiffs let the premises to the defendants at a rental of \$1,500 a month, which it was agreed should be paid in daily instalments.

Mr Cheung said it was expressly agreed that the premises were let on a temporary basis and that the plaintiffs might at any time re-enter and resume possession on giving 48 hours

private cars parked in Whitty notice, The terms of the oral agreement were reduced to writing and were contained in an agreement in Chinese signed by the defendants on a date between December 22 and 31, 1955, and ante-dated to October 16, 1955 Counsel said the tenancy was determined by notice to quit dated May 8, 1956, served by plaintiffs on the defendants but the defendants had refused and still refused to quit, and the plaintiffs had suffered damages. Hearing is continuing.

UK MUST FIGHT TO STAY IN WORLD MARKET

Report Shows Shortage Of Technical Men

By W. K. BLISS

London, June 4.

"The United Kingdom's position (in industrial production) has and will continue to have quotations and the morning's something of the nightmare quality of running up a descending escalator."

This apt illustration of the economic overstrain from which the country is suffering is used in a report on a searching five-year inquiry into a question that has been much in the public mind for years: Are the brilliant ideas of our scientists ignored too often by manufacturers and allowed sometimes to slip into foreign hands?

The answer briefly is "No." It will be difficult to increase If that descending escalator is to the supply without considerable be stopped or reversed, however, changes in the educational we require to do a lot of hard system, which, the committee thinking backed by effective thinks, is not in full accord with action, for "there is no trick of the needs of industry. Government policy which can painlessly keep British exports potential talent through adolescents leaving school to competitive."

Shaking-Up

The preparation of this report has not itself been very speedy. Nearly five years have passed since the British Association decided to appoint a committee to study the problem of speeding up the application to industry of the results of scientific research.

The Royal Society of Art, the British Association for the Advancement of Science and the States and the USSR are doing; Numeld Foundation joined in; n strong committee was formed, and their findings and opinions are now marshalled.

British industry is not universal- in science, ly backward in scientific matters, but the worst firms, "which minimise the subtle influence of by their ignorant complacency," need a it is conventional to regard pure

severe shaking-up. progresive firms, but "we do not classical scholar thinks himself think this justifies the parochial- better than any scientist." ism of large tracts of British industry." The situation for-

tunately is rapidly improving. Many of the supposed obstacles to scientific progress are found to be largely imaginary. The net effect of Government control or red tape, for instance, is found to be favourable to the speedy application of science.

Patent Office

But it is noted that the Patent Office, through inadequate staffing, takes from two to four energy and electronics." years to grant a patent, and this may slow down the application of an invention to industry. Nor does the committee find

high taxation as serious a discouragement as is generally supposed, though shortage of

science and technology. there is sometimes a reluctance labour-saving equipment. to borrow for expansion lest family control is lost,

loventors often imagine they are meagre supply. frustrated by the wicked machinations of monopolists."

found that the activities of the Williams; Oxford University Monopolies Commission have resulted in business becoming more secretive about restrictive practices.

One of the most important things favouring the adoption of scientific ideas is the general attitude of mind of the management. Science must be not "an optional extra," but part of an alert managerial outlook,

Directors

In proof of this the committee selected 500 companies quoted and the worst 50 companies from Treasury announced the profit-making point of view.

a report of this kind of theft.

Mr K. A. Bidmead, Deputy, valves are disappearing so fast Commissioner of Police said it is just not funny." this morning that at least two Mr Smith said that he bearrests for stealing car parts lieved that this was the work of children who could use them for had been made last night. He said Police were taking arcstones or for catapults. special precautions and were ficating the question seriously. sald: "This kind of thing was

"However", Mr Bidmead add- very common last year. One ed, "the Public must play then must be very careful." part too by not leaving anything in purked cars."

JUNK DEALERS

Mr R. E. Harper, Director and sales manager of Wallace Harper and Co. Ltd, said yesterday that a wind-screen wiper would fetch a price of about 50 cents or a dollar,

"There are in Hosgkong great number of junk dealers and small back alley, fly-bynight garages where the thieves can sell their loot."

Mr Harper added that windscreen wipers on large American cars, with the curved screens, usually fetched more than the usual price because they were fitted with funcy pieces of machinery.

Another car part which seems to be very popular with thieves is the tyre valve.

NOT FUNNY

Though only a small part on off nowadays, said Mr Shea, as the car, its disappearance could fewer people were putting the be very irritating. Said Mr R. car number on the cap because

FLYING ANTS INVADE HK

It's the wet sensonand Hongkong's brown flying ants are back in

They have been fluttering around dinner tables, dropping into soup bowls, crawling down open-neck shirts and blouses and making a general nuisance of themselves.

These winged insects, Mr W. Shea of Regent Molors which are really the reproductive casto of termites, have come out of their colonies to find a mate and Mr Shen said he had been inset up another colony in some wooden building, tree formed of at least four tyreslashing incidents in the

or other concealed situation. But their venture to the outside world is full of dangers, and many of them lose their life to the elements, birds, and predatory insects before they can establish a colony.

THEY'RE EDIBLE

A Chinese way of getting rid of the insects is to put a big basin of water on the floor under a ceiling

The light attracts the insects, stuns them and they fall into the basin of water and drown.

Other than that there is DDT or you can swat them — a perspiring job in lius weather.

Their mating season only lasts for a few weeks. They are, by the way, edible in some parts of the world. One person who has tried them in Africa, where the natives eat them, said they had a "sharp insect

GOODBYE

General Stratton and Lady Stratton say goodbye to friends at Queen's Pier this morning. — China Mail Photo.

General Stratton Leaves Hongkong

Lieutenant-General Sir William Stratton, Commander British Forces Hongkong, sailed in the RMS Canton with Lady Stratton at noon today on the completion of his tour of duty here.

GUSTY WINDS

A maximum gust of wind of 47 knots was re-corded at the Royal Observatory between 4 am and 5 nm today. The strong winds were

caused by a deep depresaion over South China. The depression moved to the northernmost part of the East China sea and the winds were expected to

moderate as the depression moves further away. The Royal Observatory recorded 0.02 inches of rain in the four-hour period between 8 am and 12 noon.

The Press Thanked

The Band of the 7th Queen's Own Hussars, under Sgt Price, was in attendance.

After inspecting the Guard, Sir William, had a brief talk with members of the press in which he thanked them for the courteous way in which they had reported service functions.

He said it was much appre-clated by all ranks. "My wife and I are sorry to leave for we
